Docket Number 04-7984

I am a paruretic, which means I suffer from shy bladder. Shy bladder is a real medical disorder and those suffering from it deserve a better deal than is available under present urine only testing rules. I object to the rules that equate inability to produce a specimen with refusal to test as these are unjust. SAMHSA needs to immediately mandate the use of alternative tests; oral fluid; hair; sweat patches; for anyone who requests these, but especially for those who claim to suffer from shy bladder. Present rules are improperly and perhaps illegally, through discrimination, hurting my ability to obtain and keep a job.

David Shapiro
